Section 8. Miscellaneous Access Services

8.2 Miscellaneous Access Service are provided to Customers on an individual case basis in accordance with the rules of the FCC and the Michigan Public Service Commission.

8.2.5. Presubscription

General: Presubscription is the process by which an end user Customer may select and designate to the Company an interexchange carrier (IC) for the provision of intrastate toll service. This IC is referred to as the end user's pre-designated IC. An end user customer may indicate a primary interexchange carrier or may elect to select an IC on a per-call basis by dialing an access code to make toll calls. Customers that have a pre-designated IC may also dial an access code to direct calls to an alternative IC on a per call basis. There are no initial charges associated with presubscription.

Section III. List of Exceptions to BTS Tariff FCC No.1. (Cont'd)

Section 8. Miscellaneous Access Services (contd.)

8.2.5. Presubscription (contd.)

A Customer may initiate a presubscription change at any time. The Company will maintain a listing of all available interexchange carriers and provide them on a random basis to aid the Customer in the selection process. The change of an IC is subject to the appropriate non-recurring charge to the Customer or the IC, if appropriate.

If an IC requests an intrastate primary interexchange carrier (PIC) change on behalf of a billed party with the appropriate authorization and the Customer advises the Company the authorization is denied and the IC is unable to substantiate the change, the Customer will be reassigned to its previously selected IC. If a change has already taken place the IC that requested the change will be subject to an Unauthorized PIC Change Charge in addition to the normal PIC Change Charge.
